AKASH M

CLOUD & DATA ENGINEER

Chennai, India | gamkersofficial@gmail.com | about.gamkers.in

SUMMARY

Data Engineer with 2.6 years of experience building scalable big data pipelines and cloud-based data platforms. Expertise in AWS services (EMR, Glue, Lambda, S3), Apache Spark (PySpark, Scala), and distributed data processing. Proven track record in data modeling, ETL development, workflow orchestration, and enabling data-driven decision-making at enterprise scale. Strong background in AI-powered data solutions and automation systems.

PROFESSIONAL EXPERIENCE

Executive | Cloud & Data Engineer | InfoCepts, India **Sep 2023 - Present**

- Built and optimized scalable ETL pipelines on AWS (EMR, Glue, Lambda, S3, Athena) processing terabytes of batch and streaming data, improving pipeline performance by 40%
- Engineered big data workflows using PySpark, Scala Spark, and Apache Airflow, ensuring 99.9% data pipeline reliability and reducing processing time by 30%
- Automated data ingestion processes using AWS services(EventBridge, Step Functions, Airflow), reducing manual effort by 80% and ensuring data consistency across systems
- Collaborated with cross-functional teams including software developers and business analysts to deliver data solutions supporting critical business decisions

Internship | Cloud & Data Engineer | InfoCepts, India **Feb 2023 – Aug 2023**

- Developed ETL pipelines for high-volume transactional data using PySpark, and AWS services
- Built analytics workflows for sports analytics projects (IPL data processing), gaining hands-on experience in big data technologies and cloud automation

PROJECTS

- Data Warehouse Migration – Migrated data from MySQL to Snowflake, built functions and stored procedures, designed the pipeline architecture and orchestrated workflows using Snowflake Tasks.
- Big Data Processing & Cloud ETL – Built and managed end-to-end big data pipelines on AWS EMR using Spark, orchestrated workflows with Airflow, and integrated AWS services including Lambda, Glue, S3, Athena, DynamoDB, EventBridge, and Step Functions.
- ClearVision AI Privacy-First Analytics Platform (personal Project) – Developed an LLM-powered analytics platform enabling natural language querying with full data privacy. Built an intelligent agent framework with automated reporting, reducing analysis time from hours to minutes.

SKILLS

Big Data & Cloud: Spark (PySpark, Scala), Hadoop (HDFS, Hive), Iceberg, AWS Services

SQL, ETL/ELT, Data Modelling, Data Warehousing, Apache Airflow, Snowflake, AI Agent Development, LLM Integration

Python, Scala, Shell scripting, Git version control, containers, Linux, REST API development

EDUCATION

JUL 2019 - MAY 2023

Bachelor of Technology - CSE

SRM Institute of Science and Technology (SRMIST)

- Relevant coursework: Database Systems, Data Structures, Distributed Systems, Cloud Computing

CERTIFICATIONS & ACHIEVEMENTS

- **Databricks Lakehouse Fundamentals** (2024)
- A**WS Certified Cloud Practitioner CLF-C02 (2025)** - Ultimate Bootcamp, Udemy
- **Certificate of Achievement** - Top Performance in Big Data & AWS Bootcamp, InfoCepts (2023)
- **Certificate of Appreciation** - Collaborative Excellence, InfoCepts (Dec 2024)
